

ABSTRACT

3 A carrier and docking assembly in combination for removeably interconnecting a
4 PC card device with a computer. The docking assembly is configured in size to be fixed
5 in a memory storage device bay of a computer housing, or a memory storage device
6 housing. The docking assembly includes a plug for the carrier, a power connector and an
7 interface connector. The interface connector is adapted for connection with an IDE
8 ribbon cable. The carrier includes a PC card device for receiving PC cards and a plug for
9 interconnection with the docking assembly. The carrier plug removeably couples with
10 ~~the plug of the docking assembly.~~
